EXPERIENCE

Consultant, CGI Federal

Lafayette, Louisiana — January 2015 - Current

Applications Developer for the Momentum ERP suite. Worked within a **small agile scrum** based team that developed a modern **microservice** based architecture that CGI Federal could leverage across multiple teams. I helped create and maintain multiple projects written using the framework.

Accomplishments

- High Performer, never received below 'Exceeding Expectations' for annual reviews
- Introduced Sockets middleware to Presentation Layer **NodeJS** servers using **Socket.io** and **Apache Kafka**.
- Deployed UI pattern that cut unnecessary RESTful async traffic in our **AngularJS** apps by caching data
- Modernizing the architecture for the 30+ year old Momentum ERP software suite.
- Assisted with the interview/recruitment of technical candidates for the Lafayette, LA office. My recommendations have been leaned on heavily by hiring committee.
- Designed and Developed a headless Javascript framework called 'Beaux Bot' and subsequently won 1st place at Cajun Codefest 5.0

Independent Contractor

Lafayette, Louisiana — January 2014 - December 2015

Accomplishments

- Team won the grand prize at **Cajun Codefest 3.0** for developing a prototype learning system of preventative care to supplement elderly autonomous living.
- Developed cross platform mobile apps using the ExtJS based Framework Sencha Touch.

EDUCATION

University of Louisiana at Lafayette

— Bachelor of Science,

December 2014

in Computer Science

AWARDS

- 1st place Cajun Codefest 3.0 2014 (cajuncodefest.org)
- 1st place Cajun Codefest 5.0 2017

ALM Tools Used: **JIRA, Stash, Bitbucket, Confluence**

Technologies: NodeJs, Express,

Web Developer, Information ArchiTECH LLC.

Lafayette, Louisiana — November 2012 - January 2013

Created and deployed software modules for the Magento eCommerce platform to various clients in the Acadiana region.

Accomplishments

- Assisted in the development of a module package using the Magento framework to automate a Prescription claim from customer order experience to insurance claim validator.
- Developed an extensive list of custom modules that provided a wide range of services to local companies within the Acadiana parish.
- Build/Deploy sites using Drupal, Magento and Modx

Jade/Pug, Socket.io, CSS, AngularJs, RequireJs, Jasmine, Grunt, Gulp, Jenkins, TravisCI, CouchDb/PouchDb, CassandraDb, MongoDB, Apache Solr, Oracle SQL/MySQL, Spring Boot, Git, Apache 2.4, NGinx, Maven, NPM, Bower, Yarn, Heroku, Redis

Fun Facts: I play bass, love shows that have a binge-worthy narrative, and I enjoy sports with a ball and a goal (and occasionally a frisbee).
